March 31, 2015

Dear Geology Enthusiasts,

We are very pleased to announce the formation of the Massachusetts Geological Society. We urge everyone with a passion for geology, or even just an interest, to join and become a member. To learn more about the events we have planned including field trips and upcoming meetings, go to our website at MassGeoSociety.org. Joining is easy and inexpensive.

For several years a small dedicated group of us has been talking about forming a geological society in Massachusetts. Four other states in New England -- Vermont, Maine, New Hampshire and Connecticut -- have such a group. We decided that the time had come to have an organization in Massachusetts dedicated to geology. We needed a place where folks can come and talk about or see the great geology the Commonwealth has to offer; a forum where we can learn about the latest basic and applied research or just hear fascinating stories about our natural history. Our geological history has a great story to tell.

On behalf of the Massachusetts Geological Survey and the organizing committee, I invite you to join the Massachusetts Geological Society today. If you have any questions, please don't hesitate to contact geoinfo@massgeosociety.org for more information.

Sincerely

Stephen B. Mabee, Ph.D., PG
State Geologist and Director,
Massachusetts Geological Survey
